

Project Overview:

- The project constructed a new teaching, research, and demonstration beef and sheep facility with cow-calf housing, stocker and finisher housing, sheep housing, animal handling facilities, maternity pens, metabolism facility, feed storage and mixing, and manure solids separation and storage.

Project Services:

- Curry-Wille and Associates provided architectural, livestock equipment, mechanical, and electrical design for the livestock housing and handling, feed, and manure facilities. Services were provided for programming, schematic design, design development, construction documents, bidding, and construction administration.
