

Project Location: Ames, Iowa

Project Overview:

- The project constructed a new teaching, research, and demonstration dairy facility with lactating cow free stall housing for 450 cows, milking facilities, classroom, special needs area, dry cow and heifer housing, maternity and calf facilities, feed storage and mixing, and manure solids separation and storage. The milking facilities include a Double-12 parallel parlor with subway.

Project Services:

- Curry-Wille and Associates provided structural, architectural, livestock and milking equipment, mechanical, and electrical design for the dairy housing, feed, and manure facilities. Services were provided for programming, schematic design, design development, construction documents, bidding, and construction administration.
